

Alpha Wave Engineers

Creating Alpha Wave Generators for Suspension Swing Therapy

EYE SCREW 3/8" x 4 1/2"
(a minimum of 3 1/2 inches of threaded shank is recommended, it may be longer than 3 1/2" but never shorter.)

TO SECURE EYE SCREW.

Locate ceiling joist. Pre-drill using 1/4" to 5/16" drill bit in center of joist at a 25 degree to 30 degree angle. Fill pre-drilled hole with household glue and smear on the thread of the eye screw. Install eye screw and hang chair.

TO HANG CHAIR FROM TREE.

Simply hang chair with sturdy rope or chain, preferably with a *bowline knot*.

INSTALLATION INSTRUCTION AND CARE GUIDE

Always inspect the ropes, rigging, installation points and / or knots before each use. Discontinue use if wear is evident.

Always install eye screw at a **25-30°** angle (see installation page Figure A); never pre-drill a hole or install an eye bolt in a vertical position.

Always test installation or suspension points by grasping the wood bar ends and hang with your full weight. **Never** sit in your hammock chair to test the initial installation of hanging hooks or ropes.

When entering a hammock chair **never** kneel or stand; **always** back into chair to be seated.

Always secure infants in chair by fastening net sides together; **never** leave a child or an infant unattended.

Never spin, twist or rotate rapidly in the chair as injury to user or others may result.

CARE AND CLEANING

If the oak spar becomes dull or dry, simply apply a liberal application of commercial wood oil (not stain).

Our chairs are woven to be strong and durable, but care must be taken when washing.
DO NOT MACHINE WASH OR DRY THE CHAIR.

1. Untie the knots and remove the chair from bar.
2. Tie string through the two loops. This will help prevent tangling.
3. Carefully hand wash in with a mild soap, such as Woolite. **NEVER** use bleach. Warm wash, cool rinse, hang to dry.
4. Tie net loops to chair bar using a "figure 8" knot (see installation page Figure B)

ATTENTION : IMPORTANT INFORMATION

READ THOROUGHLY: Although we use the highest quality and strongest materials, the purchaser assumes the responsibility for securing the hanging hardware, inspecting the ropes, and properly tying knots. **DreamWeavers is not responsible for damage or injury due to improper installation, misuse of our product and / or accidents that may result therefrom.**

USER TAKE NOTE: We have chosen materials designed to provide you with balance between comfort and durability. **PLEASE do not leave the chair out in inclement weather or in the way of sprinkler systems. Unhook and store in a dry place. This will prolong the life of the chair.**
