Our Alpha Wave Sensory Solution Kids

Suspension Swing Therapy = Alpha Wave Brain State
For sensory integration, vestibular input and self regulation = benefits for Mason and all children like his cousins Gavin & Alayna.

AlphaWave's AWESOME Environment

Suspension swing therapy naturally activates alpha wave brain state which in turn increases endorphin secretion promoting relaxation and calm.

Blessings & Courage for All Families as We Work Together to Rescue our Children

Alpha Wave Suspension Swing Therapy: Family wellness insurance that provides free benefits of peace, joy, health, and relaxation.

Alpha Wave Suspension Swing Therapy is Your Family Rscue Net!

Homework Heaven in an Alpha Wave Brain State

Suspension swing therapy organically recreates our natural state of homeostatis, the optimal zone of equilibrium and balance, reducing external stimuli for calm and focus supporting social, cognitive and language development.

Alpha Wave Sensory Integration Environment at Home and Beyond

Allie in Alpha Wave's Awesome Environment (Angie Voss, Allie's OTR/L Boise, ID).

Self regulation is maintained and achieved through proprioceptive activities (ex. pushing & pulling exercises in the swing) and vestibular input through therapeutic swinging. In concert with suspension therapy activities, alpha brain waves increase learning ability and improve memory. Immune system is enhanced since anxiety and stress related neurochemicals are reduced. **THESE DYNAMICS CHAMPION THE BRAIN'S NEUROPLASTICITY!**
